

4th Annual
Canadian National Proteomics
Network Symposium

April 23-25, 2012
Metro Toronto Convention Center
255 Front St. W., Toronto, Canada

Proteomics: from protein structures to clinical applications

Symposium objectives

Attendees will be exposed to cutting-edge research in proteomics and its application to cancer research. Specialized workshops (quantitative and structural proteomics) and a special session on cardiovascular proteomics will be presented during this symposium. Participants will have the opportunity to present their contributions as oral presentations or posters, and exchange ideas with experts from other disciplines during informal discussions. This symposium will be a good opportunity to develop contacts and foster new collaborations between participants. Leaders in the field of proteomics will present novel approaches and challenges to cancer proteomics research as part of different thematic sessions:

- Chemical and structural proteomics
- Protein modifications and cell signaling
- Protein interactions Network
- Translational proteomics

For more information please consult www.cnpn.ca

Invited speakers

Ruedi Aebersold, ETH Zurich

Gary Bader, CCB, University of Toronto

Catherine Costello, Boston University

Eleftherios Diamandis, University of Toronto

Bruno Domon, Luxembourg Clinical Proteomics Center

Andrew Emili, University of Toronto

Lynn Megeney, Ottawa Hospital Research Institute

Peipei Ping, University of California at Los Angeles

Juri Rappsilber, University of Edinburgh

Igor Stagljar, CCB, University of Toronto

Gerold Schmitt-Ulms, University of Toronto

Mike Tyers, Université de Montréal

David Wishart, University of Alberta

Jeffrey Wrana, Samuel Lunenfeld Research Institute, Toronto

This Symposium is sponsored by:
